TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Java

Frameworks & Libraries: React, Bootstrap, Tailwind CSS, Material UI

Developer Tools: Git, GitHub, Netlify, Vercel, VS Code

EXPERIENCE

Freelance Web Developer

Feb. 2025 – Mar. 2025

PG International School, Bihar

Remote

- Designed and developed a fully responsive school website using HTML, CSS, JavaScript, and Bootstrap, ensuring seamless performance across all devices
- Implemented SEO best practices that contributed to top rankings on Google search results for relevant keywords
- Created intuitive navigation and well-structured content to enhance the user experience for students, parents, and staff
- Integrated multimedia features including image galleries and contact forms to improve site engagement
- Ensured cross-browser compatibility and optimized responsiveness for consistent experience on all screen sizes

PROJECTS

To-Do App with Local Storage | *HTML, CSS, JavaScript*

- Built a responsive task manager that enables users to add, update, complete, and delete tasks
- Used browser local storage to persist task data without external databases
- Employed modern JavaScript practices for clean, real-time DOM updates
- Designed a minimalist UI using HTML and CSS to enhance user interaction

Weather App | *React, OpenWeatherMap API, HTML, CSS*

- Developed a responsive weather application using React to fetch and display real-time weather data
- Integrated the OpenWeatherMap API to retrieve live temperature, humidity, and condition data based on user input
- Built a clean user interface using CSS, with support for city-based search and dynamic updates
- Utilized React state and hooks to manage asynchronous data fetching and conditional rendering

React Image Enhancer App | *React, Tailwind CSS, PicWish API*

- Created a modern web app enabling users to upload images and apply AI-powered enhancements (e.g., resolution boost, color correction)
- Integrated PicWish API to process images in real-time and return visually improved outputs
- Managed async API calls and feedback states using React for smooth UX
- Modularized code into reusable UI components to improve scalability and code reusability

Personal Portfolio Website | *HTML, CSS, JavaScript*

- Designed and developed a personal portfolio website to showcase projects, skills, and contact information
- Implemented responsive design principles for seamless viewing across desktop and mobile devices
- Used vanilla JavaScript to add interactive elements and smooth navigation between sections
- Optimized website performance and accessibility following best web development practices
